President's Message

from Manoj 

Moving Forward Together

Dear MEA family members,

As I look back on the past year, I am filled with pride to see how much we have accomplished together. I want to sincerely thank each of you for your continued support and dedication at every step. All of you had been instrumental in continuing MEA's legacy of excellence.

I sincerely thank our generous members and sponsors for helping us to meet the financial targets, allowing us to achieve the primary objective of providing scholarship to deserving engineering students.

Want to take this opportunity to thank all the board members for their dedication, hard work and support to make sure all the activities are planned and executed efficiently.

Kudos to our scholarship committee for working tirelessly through a high volume of applications to find the perfect, deserving candidates.

We empowered our scholars to overcome language challenges by successfully delivering English communication courses as part of our mentoring program. Facilitated webinars on diverse topics achieving a high level of attendee engagement and interaction.

I want to thank the whole MEA family for enthusiastically participating and supporting all the events. Also want to acknowledge the volunteers who wholeheartedly engaged to help run events seamlessly.

I invite you all to remain active in advancing the MEA's mission. Together, we can ensure continued growth and a lasting legacy for our esteemed organization. Thank you for your unwavering support. Serving as your President has been a profound honor, and I look forward to the association's bright future.

Manoj Anirudhan
MEA President

- **Scholarship Board is in the final stages of determining the list of recipients and will be published at the GBM.**
- **A total of 13 scholarships can be awarded**

MEA CONNECT WEBINAR

Title: A Passage to Agentic AI

Feb 7, 2026, Saturday, 09:30 AM US Central Time

Agentic Architecture- How any Engineer can build systems.

Mathew talked about how two products -Claude Code & very recent Claude Cowork will revolutionize how we design, create and evolve systems. He also gave a glimpse how super humans evolve.

Mathew is a tech enthusiast, cloud and enterprise architect with primary focus on AI, data and security. He is an ISC Cloud Security Certified Professional with Security specialization in AWS, GCP , Azure and Oracle Cloud Platforms.

MEA CONNECT WEBINAR

Title: Mental Health

Jan 10, 2026, Saturday, 09:30 AM US Central Time

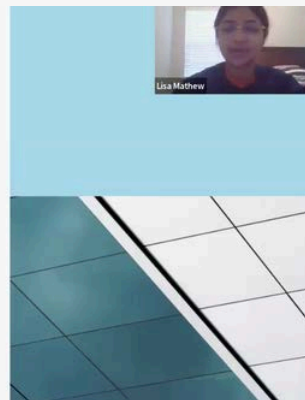

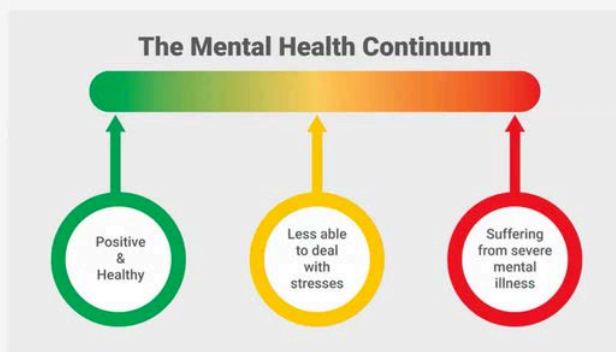

This session was conducted by a non profit organization, MHISA, that focuses on South Asian mental health. Similar sessions had been conducted by them at other cultural organizations.

It's an intro level mental health workshop to discuss how to break stigma around mental health through opening healthy mental health convos and by having open discussions that help with engagement of the audience.

Will be discussing an introduction to mental health, including what it is, addressing the stigma around it, and fact checking common myths!
